

12-WEEK LIVE PROGRAM

Product Management.

A hands-on, case-study-driven program where you learn Product Management the way real product teams practice it — from discovery to strategy, delivery, launch and growth — then walk away with a portfolio-ready product case study.

Design

PM-09

Roadmaps & Go-To-
Market

HOW IT WORKS

Built like a real product team — every single week.

This isn't a lecture series. Every week follows the same rhythm real product teams use: prepare, work the case, apply it to your own capstone product, get feedback.

PHASE 01 · WEEKS 1–4

Discover

Where every product professional has to start — understanding users, discovering real problems, and defining a product vision and strategy worth building.

PHASE 02 · WEEKS 5–8

Build

Where it becomes real — solution discovery, MVPs, writing PRDs and user stories, and delivering with Agile, Scrum and stakeholder management.

PHASE 03 · WEEKS 9–12

Launch, Measure & Grow

The skills teams actually pay for — roadmaps, go-to-market, product metrics, growth, monetization, and leading products through ambiguity.

LIVE WEEKLY SESSIONS

3

MONTHS, START TO FINISH

Direct

ACCESS TO YOUR FACILITATOR

STEP 01

Pre-Read Sent

Reading material for the week is sent ahead of class, so you walk in already familiar with the topic.

STEP 02

Live Case Study

The live class works through a real-world product case study built around that week's topic — not just theory.

STEP 03

Build On Your Capstone

Every week you apply what you learned to your own product, building a portfolio-ready case study as the program progresses.

STEP 04

Direct Access

Mentorship access to your facilitator throughout the program — for questions between classes too.

A note on facilitation: Every cohort is led by an OIStride-trained facilitator, delivering the curriculum, case studies and standards set by our founder.

Discover

Where every product professional has to start — understanding users, discovering real problems, and defining a product vision and strategy worth building.

PM-01 · WEEK 1

Product Management Foundations

APPLICATION: PRODUCT TEARDOWN

- What Product Management actually is, and what a PM does day to day
- Product Manager vs Project Manager vs Program Manager
- Product thinking: outcomes over outputs, and customer-centric decisions

PM-02 · WEEK 2

Users, Customers & Product Discovery

APPLICATION: DESIGN A USER RESEARCH EXERCISE

- User vs customer, segments, personas & the 80/20 rule
- Qualitative & quantitative research: interviews, surveys & observation
- Turning customer feedback into validated product insight

PM-03 · WEEK 3

Problem Discovery, Validation & Market Analysis

APPLICATION: VALIDATE A REAL PRODUCT PROBLEM

- Framing problem statements & separating symptoms from root problems
- Validating assumptions with evidence, not opinion
- Market & competitive research, and assessing real opportunity

PM-04 · WEEK 4

Product Vision, Strategy & Business Model

APPLICATION: DEVELOP A PRODUCT STRATEGY

- Product vision vs strategy vs roadmap — and why the difference matters
- Value Proposition Canvas & Business Model Canvas
- Setting product goals, KPIs & OKRs that connect to business strategy

Build

Where it becomes real — solution discovery, MVPs, writing PRDs and user stories, and delivering with Agile, Scrum and stakeholder management.

PM-05 · WEEK 5

Solution Discovery, Ideation & MVP

APPLICATION: DESIGN AN MVP EXPERIMENT

- Moving from problem to solution: ideation, design thinking & validation
- What an MVP actually is — and the most common ways teams get it wrong
- Designing MVP experiments with clear learning objectives & success criteria

PM-06 · WEEK 6

Product Requirements & Product Design

APPLICATION: WRITE A PRD & USER STORIES

- Structuring a PRD that teams can actually build from
- Writing user stories, epics & acceptance criteria that hold up under scrutiny
- Working with design & engineering: feasibility, trade-offs & ambiguity

PM-07 · WEEK 7

Prioritization, Backlog & Product Planning

APPLICATION: PRIORITIZE A PRODUCT BACKLOG

- Prioritization frameworks: MoSCoW, RICE, Kano & Value vs Complexity
- Managing a healthy backlog: epics, features, bugs & technical debt
- Release planning around outcomes, not just output

PM-08 · WEEK 8

Agile Delivery, Scrum & Stakeholder Management

APPLICATION: SIMULATE A DELIVERY CYCLE

- Agile principles & Scrum in practice: sprints, ceremonies & roles
- Managing delivery risk, scope & technical debt with engineering teams
- Stakeholder mapping, negotiation & influencing without authority

Launch, Measure & Grow

The skills teams actually pay for — roadmaps, go-to-market, product metrics, growth, monetization, and leading products through ambiguity.

PM-09 · WEEK 9

Product Roadmaps, Launch & Go-To-Market

APPLICATION: BUILD A ROADMAP & LAUNCH PLAN

- Outcome-based roadmaps vs feature lists — and how to communicate them
- Launch planning: readiness, internal & external launch, post-launch review
- Go-to-market: positioning, messaging & sales enablement

PM-10 · WEEK 10

Product Metrics, Analytics & Experimentation

APPLICATION: DESIGN A MEASUREMENT FRAMEWORK

- North Star metrics, leading vs lagging indicators, avoiding vanity metrics
- Funnel metrics: acquisition, activation, retention, churn & NPS
- Running A/B tests & experiments that actually change decisions

PM-11 · WEEK 11

Product Growth, Monetization & Product-Market Fit

APPLICATION: BUILD A GROWTH & MONETIZATION STRATEGY

- Identifying & measuring real product-market fit
- Growth loops, retention strategy & conversion optimization
- Monetization models: subscription, freemium, usage-based & value-based pricing

PM-12 · WEEK 12

Product Leadership, Career Readiness & Capstone

APPLICATION: PRESENT THE END-TO-END PRODUCT

- Product leadership: decision-making under ambiguity & cross-functional influence
- Building a portfolio-ready product case study that shows real thinking
- Presenting your complete, end-to-end Product Management capstone

WHO THIS IS FOR

Built for people who need this to actually work.

No prior Product Management experience required — the program starts from the fundamentals and builds up to advanced, tool-based product practice.

Aspiring & Junior PMs

Learn the tools and frameworks to kickstart a product management career with confidence.

Career Switchers

Build job-ready, practical skills that stand out immediately in interviews and on the job.

Business Analysts

Round out your skill set with structured product discipline and hands-on delivery experience.

Founders & Freelancers

Learn to discover real problems, define strategy and ship products on schedule.

Tech & Ops Professionals

Work better with product and engineering teams by speaking their language.

Anyone Ready To Commit

Weekly live classes over three months — built for someone serious about finishing what they start.

YOU'LL WALK AWAY WITH

- ✓ A working grasp of Product Management, tested against real case studies
- ✓ A complete, portfolio-ready product case study — from discovery to growth
- ✓ The ability to run discovery, define strategy & manage delivery end-to-end
- ✓ A prioritized backlog, PRD, roadmap and GTM plan you built yourself

FORMAT AT A GLANCE

- ✓ 12 live classes, 2 hours each, once a week, over 3 months
- ✓ Pre-reads before every class, case study during
- ✓ A live capstone product built progressively across the program
- ✓ Direct mentorship access to your facilitator throughout

Obomhense Idemudia
"JED" · FOUNDER, OI STRIDE ACADEMY

ABOUT THE FOUNDER

Learn from someone doing the job, not just teaching it.

Jed is a Senior Product Manager and product leader whose work cuts across industries — fintech, healthcare, travel, and beyond — owning real product decisions, sprint execution and cross-functional delivery, not just training slides. He has trained and mentored professionals across Nigeria, Canada, the UK, the USA and West Africa, bringing practical product discipline and modern, AI-augmented ways of working into every session.

Cross-Industry Practice

Real Senior PM experience spanning fintech, healthcare and travel-tech — not a single-domain background.

Trainer & Coach

Years of experience facilitating Product Management, Agile and Scrum training across multiple continents.

Modern PM Toolkit

Hands-on fluency across the tools working PMs rely on daily — Jira, Trello, and AI workflows like ChatGPT & Claude.

GOOD TO KNOW

What's included, and what's optional.

CORE PROGRAM

Everything Inside the 12 Weeks

Fully included in your program, no extra cost:

- ✓ All 12 live weekly classes, case-study led
- ✓ Pre-read materials before every session
- ✓ A live capstone product, built and refined week by week
- ✓ Live Q&A after every class
- ✓ Direct mentorship access throughout

OPTIONAL ADD-ON

LinkedIn & CV Optimization

Not automatically included — available if you want it, discussed separately:

- ✓ Learn how to optimize your own LinkedIn profile
- ✓ Learn how to structure and tailor your own CV
- ✓ Coaching on the process, not a done-for-you service
- ✓ Scope & terms agreed directly with your facilitator
